"Name and details"

PREVIOUSLY CONTACTED

"Name and details"

Select a client to get started on Level 3

first screen of level 3, only shows clients tagged "previously contacted" from level 2. count here is just 2 for now to match level 2's layout, haven't actually confirmed how many contacted clients there'll be so don't treat that as final. no real click-through built in either, the actual selection logic depends on the LLM stuff we haven't nailed down yet, so this is just the general shape of the screen, not a working link to whatever comes next.

Prepare Questions

What questions or topics do you want to cover in the meeting? Add up to 3.

1. Type your question here...

2. Type your question here...

3. Type your question here...

Review Preparation →

max 3 questions here, same pattern as the objectives screen. continue button should lead into the prep feedback screen (haven't 100% locked that down, but that's the idea).

Set Meeting Objectives

What do you want to achieve in this meeting? Select up to 3.

1.

2.

3.

4.

Prepare Questions →

shows 4 options but player can only pick up to 3, make sure that cap's actually enforced, not just written in the prompt text. leads into prepare questions after.

**Client File**

[Client name] – [Industry]

**Company & Industry**

**Business Situation (problems, pain points, desired outcomes)**

**Stakeholders & Current Tech**

**Set Meeting Objectives →**

business situation section covers problems/pain points/desired outcomes all in one field, we didn't have room for desired outcomes as its own section so it's folded in here, not missing on purpose. leads into set meeting objectives next.

top part just recaps what they did (file reviewed, objectives set, questions prepped), no interaction there. the 4 lines under "AI feedback" are where the actual generated feedback goes, that's dynamic not static text. continue button drops them into level 4.
